

December 18, 2020

Dear Valley View Friend/Family Member,

We are so appreciative that residents, families, and team members have inquired about the availability of the COVID-19 vaccine. Over the past week, we have learned that the vaccine should be available to us at the beginning of the New Year. Given the temperature parameters in which the vaccine needs to be stored, Valley View will be partnering with a pharmacy who will be on-site and assist with administering the vaccine. Once these dates and times are confirmed they will be shared with each of you. Until then, our efforts are focused on team member and resident education. Valley View Medical Director, Dr. Paul Koberna is sharing helpful information on Valley View's in-house TV channel as well as printed resources outlining the benefits of this immunization choice.

Similar to the flu vaccine, consent will be obtained from the resident, if able, or by their responsible person on their behalf. We look to the New Year with optimism, hope, and the benefits this vaccine will bring.
